Intro to Korean Calligraphy
Greg Thompson

Intro to Korean Calligraphy

Greg Thompson

What You Need for Calligraphy

- 붓 – Korean calligraphy uses a variety of brushes of different sizes. Some are really big and others are really thin. You can also use a 붓펜 or regular pen.
- 먹 – Blank ink is the most common way to write traditional calligraphy. Modern calligraphy might use some other inks or water color paints.
- 벼루 – This is a large stone ink container. The center of the 벼루 depresses so that the ink pools at the bottom.
- 종이 – Korean calligraphy uses special paper that absorbs the ink well. However, you might be able to use other materials like regular paper or even candles.

What You Need for Calligraphy

붓 (Brushes)

Korean calligraphy uses a variety of brushes of different sizes

먹 (Blank ink)

Blank ink is the most common way to write traditional calligraphy

벼루 (Ink stone)

Styles

- There are many different st yles of calligraphy.
  - 흘림 – This is curvy.
  - 정자 – This is straight.
  - 궁체 – This is court or royal style.
  - The difference between the m is the style of the writing based on things like weight and curve and connection.
